

Exhibit Space Preparation Costs and Deadlines for the 2018 Farm Progress Show

No lot alterations shall be performed without prior approval by Central Iowa Expo (CIE).

1. Conversion of a Grass Lot to a Permanent Rock Lot:

Requests to convert a grass lot to a rock lot must be submitted to Central Iowa Expo by **June 1st, 2018** to qualify for the following rates. (If FPS hasn't assigned lot locations by May 15th, CIE will work with exhibitors on pricing.)

Requests submitted following May 15th will be subject to a 15% fee above the listed prices. No request will be accepted after July 1, 2018.

Converting up to (3) 40' x 70' exhibit spaces from grass to rock - \$1,300 per exhibit space plus tons of Class A ¾" Limestone used @ \$34/ton. (75-100 tons per exhibit space)

Example: 1 lot would cost \$1300 conversion cost+ \$3400 maximum rock cost= Total cost per space: \$4700

Converting (4) or more 40' x 70' exhibit spaces from grass to rock - \$1,000 per exhibit space plus tons of Class A ¾" Limestone used @ \$34/ton. (75-100 tons per exhibit space)

An annual license agreement is also required for rock lots. Please contact CIE for a draft copy.

2. Maintenance of Existing Rock Lots:

All requests for additional rock on existing rock lots must be submitted to CIE by **June 15th, 2018**. Requests submitted following that date will be subject to a 15% fee above the listed prices. No request for new rock will be accepted after July 15th, 2018.

All rock deliveries will be coordinated through CIE and billed based on tons of rock used.

Two pricing options will be available for top dressing rock lots with Class A ¾" Limestone:

- a. CIE will deliver and spread the rock on exhibitor's lot: \$45/ton
- b. CIE will deliver to exhibitor's lot and **Exhibitor** will be responsible to spread the rock: \$32/ton.

As a reference, a dump truck hauls about 18 tons of rock per load.

This new option is an effort by CIE to offer cost savings for exhibitors with the ability to do the work themselves. Any damages caused to infrastructure or neighboring lots will be the sole responsibility of the exhibitor to correct if option "b" is chosen.

Please email or call Pete Bergstrom, (CIE Facilities Manager) with rock surfacing requests or questions.
